## SOLAR HOT WATER

### Stainless Steel Electric and Storage Cylinders

Wilson Hot Water is a leading supplier of mains pressure stainless steel cylinders to the solar hot water industry. Wilson **qudos**<sup>™</sup> solar water heaters are available with flow and return ports for direct connection to solar panels with or without electric element. Temperature probe pockets are available upon request.

Wilson **qudos**<sup>™</sup> mains pressure cylinders are manufactured in Australia to Australian Standards using 445M2 stainless steel, finished in COLORBOND<sup>®</sup> steel and insulated with polyurethane foam. All our domestic tanks are covered by a 10 year warranty on the cylinder\* and a 12 month warranty on electrical parts/labour. Sizes available are 160, 250 and 315 litre capacities with the option of twin or mid mount elements.

### design data

#### Capacities

160, 250 and 315 Litre

#### Cylinder

445M2 stainless steel

#### Outer Casing

Dune COLORBOND<sup>®</sup>

#### Design Pressure

700kpa

#### Elements

Bolt - on Incaloy sickle element

160 litre - 3.6 kW

250 litre - 3.6 kW

315 litre - 3.6 kW

#### Thermostat

Adjustable contact thermostat

#### Safety

Pressure and temperature relief valve 850kpa

#### Fittings

Inlet/outlet 20mm BSP  
1 x 15mm BSP (PTR valve)

#### Approvals

Watermark approved  
MEPS compliant

#### Warranty

10 Years\*

- refer to warranty card for details
- specifications subject to change without notice
